

## Useful Apps for identifying and recording wildflowers and animals

Please use the Thames Valley Environmental Records Centre's website wherever possible to record your sightings <https://sightings.tverc.org/> as this database is accessed by developers and Council planners to assist them to protect local biodiversity.

The following apps enable you to identify plant/animals. Some also enable you to record your sightings in the provider's database. There is a small charge for some of those listed. **A shortcut to the App is highlighted in pink.**
